

JDG 2017

Conference on Geometry and Topology

Celebrating 50 Years of the Journal of Differential Geometry

April 28–May 2, 2017

**Harvard University Science Center
Hall B**

Journal of Differential Geometry
1967–2017

Journal Of Differential Geometry	
M. Morse, Focal sets of regular manifolds M_{n-1} in E_n	1
S.S. Chern, Einstein hypersurfaces in a Kählerian manifold of constant holomorphic curvature	21
C.J. Earle & J. Eells, Jr., Foliations and fibrations	33
H.P. McKean, Jr. & I.M. Singer, Curvature and the eigenvalues of the Laplacian	43
K. Yano & S. Ishihara, Fibrated spaces with projectable Riemannian metric	71
Y.K. Cheng & C.C. Hsiung, Curvature and characteristic classes of compact Riemannian metric	89
Y. Matsushima, A formula for the Betti numbers of compact locally symmetric Riemannian manifolds	99
E. Calabi, Minimal immersions of surfaces in Euclidean spheres	111
V.W. Guillemin & S. Stenzel, The Levy conjecture and the local equivalence problem for G-structures	127
W.S. Piper, Algebraic deformations theory	133
H.I. Ebinow, Geometry of manifolds of maps	169
Vol. 1 - No. 1 - Nov. 1967	

Journal Of Differential Geometry	
O. Cifciok, M. Eidi, & A. Vokunin, Isoperimetry in asymptotically conical manifolds	1
C. Conall & B. Farb, Erratum for "The degree theorem in higher rank"	21
P. Glynn-Sheil & Y. Liokumovich, Width, Ricci curvature, and minimal hypersurfaces	33
L. Katzarkov, M. Kontsevich, & T. Pantev, Divergence-Free-Torsion Theorems for Landau-Ginzburg models	55
F. Schaffhauser, On the Neumann-Schubert correspondence for real and quaternionic vector bundles	119
Vol. 103 - No. 1 - January 2017	

Background Image: The picture redraws a surgery description of the graph manifold $Y_{(5,5,n)}$. This is figure 8 in R. Baykur, J. Van Horn-Morris, with an Appendix: S. Lisi and C. Wendl, "Families of contact 3-manifolds with arbitrarily large Stein fillings" *JDG*, 101 (2015) 423–465. The figure belongs to the proof that there are infinite families of contact 3-manifolds each admitting a Stein filling whose Euler characteristic is larger and signatures is smaller than any two given numbers. (Image modified in Mathematica by Oliver Knill.)

Register online at: <http://math.harvard.edu/jdg>

Limited financial support may be available to qualified participants to cover some travel costs. Graduate students, recent PhDs, and members of underrepresented groups are especially encouraged to participate and to apply for support. Graduate students should ask a faculty member to write a brief recommendation letter; recent PhDs should forward a CV via email with the subject line *JDG* Conference. Email letters and CVs to maureen@math.harvard.edu. Contact maureen@math.harvard.edu for information and details.

Organized by Harvard University, Lehigh University, and the Journal of Differential Geometry.
Supported by the National Science Foundation (NSF).
